PROFESSIONAL SUMMARY

Full-stack developer with 6+ years of experience building and running production web applications with Laravel, PHP, Next.js, React.js, and NestJS. I own the full cycle: requirements, database and API design, security, performance, and deployment. I review code, mentor junior developers, and work directly with business users to turn requirements into working software.

KEY HIGHLIGHTS

- **6 projects owned end to end** at Phluid Worldwide, from requirements and technical design to production deployment.
- **Mentored 3 junior developers** and ran code reviews to keep quality and standards high.
- **Sped up data delivery by about 30%** through Laravel REST API and frontend performance improvements.
- **Founded and run Pyllord Courses**, a production Laravel platform with payments, security, and my own Docker deployment.
- **1,000+ users** reached by a phone number verification platform I co-developed (Trust Check).

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, NestJS, REST API design, API integration, authentication, RBAC
Frontend: React.js, Next.js, TypeScript, JavaScript, Astro, Tailwind CSS, Redux Toolkit, Zustand, Zod
Databases: MySQL, PostgreSQL, MongoDB, MariaDB, Redis
DevOps & Cloud: Git, Docker, CI/CD, Coolify, Traefik, Cloudflare, AWS, DigitalOcean
Practices: Agile, Scrum, code review, mentoring, Postman, Jest
Languages: Burmese, English

FLAGSHIP PROJECT

Pyllord Courses | courses.pyllord.com — Founder & Developer

- Designed, built, and launched a production learning platform: Laravel 12 REST API, Astro SSR and React student site, and a React admin dashboard (TypeScript).
- Built course management, enrollment, role-based access control, daily video unlock scheduling, Stripe and MMQR payments, and Cloudflare R2 storage.
- Secured the platform with HMAC-signed APIs and Cloudflare Turnstile bot protection; added AI blog generation with the Gemini API.
- Run production on a VPS with Docker, Coolify, and Traefik; fixed crashes, queue problems, and 502/504 errors to reach stable uptime.
- Planning performance and capacity upgrades for 100+ students online at the same time (rate limiting, queue separation).
- Created and teach a Burmese-language Git & GitHub course (25 videos); 10+ students enrolled.

PROFESSIONAL EXPERIENCE

Phluid Worldwide, Singapore — Apr 2023 – May 2026
Full-Stack Developer (Remote)

- Owned 6 projects end to end: requirements, technical design, React.js front ends, Laravel REST APIs, and production deployment.
- Sped up data delivery by about 30% with API improvements and frontend optimization (code splitting, lazy loading).
- Mentored 3 junior developers and ran code reviews; worked with business users and cross-functional teams to gather requirements.
- Built rule-based chatbots with Botpress and custom code, supporting 300+ chatbot interactions.
- Managed infrastructure, improved CI/CD workflows, and resolved production incidents to keep releases reliable.

Tec Link Myanmar, Myanmar — Jun 2022 – Apr 2023
Full-Stack Developer (On-site)

- Built e-commerce applications, admin dashboards, and server-rendered Next.js and React.js applications.
- Supported a cross-platform delivery app (Android, iOS, web); integrated backend APIs and tuned performance.
- Contributed to CI/CD workflows and production deployments.

Freelance Full-Stack Developer Apr 2021 – Apr 2023

Clients: National Cyber City (AIoT, Myanmar) and Neocardz (Singapore / India)

- **National Cyber City:** built IoT platforms, real-time chat, and e-commerce systems with NestJS, React, and Next.js, including REST APIs, authentication, and database integration; improved delivery speed and operational efficiency by about 30%.
- **Neocardz:** built NFC digital business card platforms, e-commerce interfaces, and admin dashboards with React and Next.js; optimized server-rendered pages.
- Worked with mobile, design, backend, and QA teams; contributed to CI/CD and production deployments.

Nanolabs Limited, Myanmar Jun 2020 – Nov 2020

Backend Developer (Remote)

- Built REST APIs and backend features for an e-commerce platform with Node.js and Laravel; optimized database queries and API performance.

OTHER PROJECTS & EXPERIENCE

Trust Check | checker.thanlar.com Co-developer

- Co-developed and deployed a phone number verification platform with React, Vite, and Cloudflare Pages; reached 1,000+ users.

Green Hackers Institute, Myanmar Oct 2019 – Dec 2019

Web Design Teaching Assistant

- Mentored 20+ students in HTML, CSS, and JavaScript.

EDUCATION

Bachelor of Computer Science, University of Computer Studies, Meiktila, Myanmar | 2014 – 2020
